Dave –

I believe item 3 should be Pilgrim permit, not Mt. Tom.

Dave,

The topics you list the attached agenda are fine for tomorrow, although I'm not familiar with Polar Beverages. Please add three other items:

1. B&M - did you send cert and signature page?
2. Plan for MS4 GP antidegradation language
3. Mt Tom draft permit
4. New framework for determining WET permit requirements and reductions in WET test requirements: I propose we start with this and have asked Shauna Little to participate in the first part of the meeting - the topic is likely of interest to OES as well. I believe I sent you 3 charts (keys) and some explanatory material on WET testing permit requirements two weeks ago.
